

*Please Don't Talk About Me When I'm Gone*

(G Edim Am7 D7)

G                                    B7                                    E7  
Please don't talk about me when I'm gone.

                                  A7                                    D7                                    G                    D7  
My honey, though our friendship ceases, from now on.

                                  G                                    B7                                    E7  
And if you can't say anything real nice.

                                  A7                                    D7                                    G                    D7                    G  
It's better not to talk, at all, that's my advice.

-chorus-

B7  
You go your way, I'll go mine.

E7  
That's the thing to do.

A                                    A7  
Here's a kiss, I hope that this,

                                  D                                    D7  
brings lots of luck to you.

G                                    B7                                    E7  
Makes no difference how I carry on.

                                  A7                                    D7                                    G  
My honey, please don't talk about me when I'm gone.
